

9—LINEATION

REF NO	DESCRIPTION	SYMBOL	CARTOGRAPHIC SPECIFICATIONS*	NOTES ON USAGE*
9.1	Approximate plunge direction of inclined generic (origin or type not known or not specified) lineation or linear structure (1st option)		lineweight .2 mm 	Open-arrowed ("2nd option") symbols may be used to show a second generation or another instance of a particular lineation. Lineation symbols may be used separately or combined with other symbols.
9.2	Approximate plunge direction of inclined generic (origin or type not known or not specified) lineation or linear structure (2nd option)		all lineweights .2 mm 	
9.3	Inclined generic (origin or type not known or not specified) lineation or linear structure (1st option)—Showing bearing and plunge			
9.4	Inclined generic (origin or type not known or not specified) lineation or linear structure (2nd option)—Showing bearing and plunge			
9.5	Horizontal generic (origin or type not known or not specified) lineation or linear structure (1st option)—Showing bearing		lineweight .2 mm 	For lineation symbols representing a single observation at one locality, the point of observation is at one of the following two places: for inclined lineations, at the "tail" end (opposite the arrow-head); for horizontal lineations, at the midpoint of the bearing line. For a single lineation symbol combined with a single planar-feature (for example, bedding or foliation) symbol, join the "tail" end of the lineation arrow to the midpoint of the strike line of the planar-feature symbol; the junction point is at the point of observation.
9.6	Horizontal generic (origin or type not known or not specified) lineation or linear structure (2nd option)—Showing bearing		all lineweights .2 mm 	
9.7	Vertical or near-vertical generic (origin or type not known or not specified) lineation or linear structure (1st option)		all lineweights .2 mm 	
9.8	Vertical or near-vertical generic (origin or type not known or not specified) lineation or linear structure (2nd option)			
9.9	Inclined parting lineation in sedimentary materials (1st option)—Showing bearing and plunge		all lineweights .2 mm 	For multiple observations at one locality, join all symbols at their "tail" ends (opposite the arrowheads or other ornamentalations); the junction point is at the point of observation.
9.10	Inclined parting lineation in sedimentary materials (2nd option)—Showing bearing and plunge			
9.11	Horizontal parting lineation in sedimentary materials (1st option)—Showing bearing		all lineweights .2 mm 	
9.12	Horizontal parting lineation in sedimentary materials (2nd option)—Showing bearing			
9.13	Inclined sole mark, tool mark, scour mark, flute mark, groove, or channel in sedimentary materials (1st option)—Showing bearing and plunge		2.0 mm 	For multiple observations at one locality, join all symbols at their "tail" ends (opposite the arrowheads or other ornamentalations); the junction point is at the point of observation.
9.14	Inclined sole mark, tool mark, scour mark, flute mark, groove, or channel in sedimentary materials (2nd option)—Showing bearing and plunge		all lineweights .2 mm 	
9.15	Horizontal sole mark, tool mark, scour mark, flute mark, groove, or channel in sedimentary materials (1st option)—Showing bearing		2.0 mm 	
9.16	Horizontal sole mark, tool mark, scour mark, flute mark, groove, or channel in sedimentary materials (2nd option)—Showing bearing		all lineweights .2 mm 	
9.17	Inclined slickenline, groove, or striation on fault surface (1st option)—Showing bearing and plunge		lineweight .2 mm 	For multiple observations at one locality, join all symbols at their "tail" ends (opposite the arrowheads or other ornamentalations); the junction point is at the point of observation.
9.18	Inclined slickenline, groove, or striation on fault surface (2nd option)—Showing bearing and plunge		all lineweights .2 mm 	
9.19	Horizontal slickenline, groove, or striation on fault surface (1st option)—Showing bearing		lineweight .2 mm 	
9.20	Horizontal slickenline, groove, or striation on fault surface (2nd option)—Showing bearing		all lineweights .2 mm 	
9.21	Inclined surface groove or striation (origin not known or not specified) (1st option)—Showing bearing and plunge		all lineweights .2 mm 	For multiple observations at one locality, join all symbols at their "tail" ends (opposite the arrowheads or other ornamentalations); the junction point is at the point of observation.
9.22	Inclined surface groove or striation (origin not known or not specified) (2nd option)—Showing bearing and plunge			
9.23	Horizontal surface groove or striation (origin not known or not specified) (1st option)—Showing bearing		all lineweights .2 mm 	
9.24	Horizontal surface groove or striation (origin not known or not specified) (2nd option)—Showing bearing
