

2—FAULTS (continued)

REF NO	DESCRIPTION	SYMBOL	CARTOGRAPHIC SPECIFICATIONS*	NOTES ON USAGE*
2.2—Normal faults				
2.2.1	Normal fault—Identity and existence certain, location accurate. Ball and bar on downthrown block			Ball and bar symbols are placed along a fault to indicate its overall fault type (normal fault). Ball and bar symbols may also be placed along other types of faults at specific localities where observations of normal (or apparent normal) offset have been made (see Section 2.11).
2.2.2	Normal fault—Identity or existence questionable, location accurate. Ball and bar on downthrown block			
2.2.3	Normal fault—Identity and existence certain, location approximate. Ball and bar on downthrown block			Ball and bar symbols may be combined with paired arrows to show oblique offset (see Sections 2.7, 2.11). In cross section, use paired arrows to show relative motion of normal faults (see Section 2.11).
2.2.4	Normal fault—Identity or existence questionable, location approximate. Ball and bar on downthrown block			
2.2.5	Normal fault—Identity and existence certain, location inferred. Ball and bar on downthrown block			
2.2.6	Normal fault—Identity or existence questionable, location inferred. Ball and bar on downthrown block			
2.2.7	Normal fault—Identity and existence certain, location concealed. Ball and bar on downthrown block			
2.2.8	Normal fault—Identity or existence questionable, location concealed. Ball and bar on downthrown block			
2.2.9	Low-angle normal fault—Identity and existence certain, location accurate. Half-circles on downthrown block			Half-circles indicate overall fault type (low-angle normal fault); they are not placed at specific localities where observations have been made.
2.2.10	Low-angle normal fault—Identity or existence questionable, location accurate. Half-circles on downthrown block			
2.2.11	Low-angle normal fault—Identity and existence certain, location approximate. Half-circles on downthrown block			In cross section, use paired arrows to show relative motion of low-angle normal faults (see Section 2.11).
2.2.12	Low-angle normal fault—Identity or existence questionable, location approximate. Half-circles on downthrown block			
2.2.13	Low-angle normal fault—Identity and existence certain, location inferred. Half-circles on downthrown block			
2.2.14	Low-angle normal fault—Identity or existence questionable, location inferred. Half-circles on downthrown block			
2.2.15	Low-angle normal fault—Identity and existence certain, location concealed. Half-circles on downthrown block			
2.2.16	Low-angle normal fault—Identity or existence questionable, location concealed. Half-circles on downthrown block
